DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statements (IDS) submitted on May 6, 2005 is acknowledged. Since the Information Disclosure Statements comply with 37 CFR 1.97 and 37 CFR 1.98 the references submitted there in have been considered.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because drawings are handwritten. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: No prior art of record teach or fairly suggest a method and system to measure pulse volume using an autocorrelation on a plethysmographic signal, performing a signal average and measuring a pulse volume in accordance with the averaged signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims 1-22 are allowed. Palatnik (U.S. Patent No. 5558096) teaches a method of taking a plethysmographic signal comprising a plurality of plethysmographic waveforms, performing an autocorrelation on the signal to determine locations of the individual waveforms. Palatnik fails to teach the use of the autocorrelation to isolate one plethysmographic waveform, convolving the waveform with the signal and performing signal averaging between the isolated waveform and the aligned signal and finally performing a pulse volume measurement.

5. Marks (U.S. Patent No. 4548211) teaches a method and apparatus for measuring pulse volume. However, Marks fails to teach a method of measuring pulse volume using an autocorrelation function.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zoe E. Baxter whose telephone number is 571-272-8964. The examiner can normally be reached on Monday-Friday 7:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor II can be reached on 571-272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
